

90° PALLET TILTER

— Strong

— Unique

— Moveable

Pallet Tilters up to 80.000 kg

Let us take care of your back problems !!!

Due to the unique construction of the EASY - TEC Pallet changer, only one person is able to change a pallet quickly and above all safe.

The pallets can be placed on the unit by means of a forklifttruck or stacker.

With a single push of the button the pallet is tilted 90° within 15 seconds.

During the last part of the tilting movement, the platform is automatically retracted for about 100 mm, so the old pallet can be taken away, and the new pallet

can be inserted!

As standaard, the unit is delivered with a 1Ph 230 V connection so it can be placed in every environment. It speaks for itself that a 3Ph 400 V connection can be delivered.

The complete unit is electrically operated, so there are no hydraulics cylinders and oil present.

For all EASY-TEC pallet changers, no expensive pits or safety gates are needed. The unit doesn't even have to be bolted

to the floor!

The unit can be picked up with for instance a forklifttruck, and is therefore executed with fork-entries at the bottom.

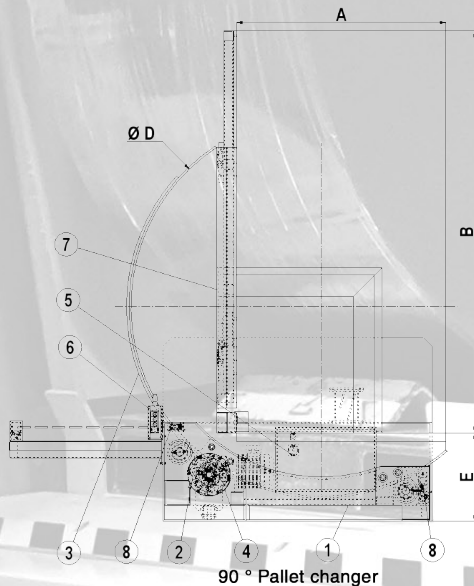

At MQ Lift BV you'll find the perfect solution for any of your tilting or changing problems !!!
